Content

- Intoduction

- The mission of Quality Assurance and Accreditation System in academia

- Expected results

- Main requirements

- Documentation Material

- Getting ready for the accreditation

Introduction

- Ministerial Conference Yerevan 2015 - Bologna process

Introduction

- Internationalization of Higher Education
- Digital learning
- New types of Syllabus implementation

Introduction

- Student in the center

- International Recognition (ECTS, Diploma Supplement

- New University managerial strategies (quality assurance)

NEW TEACHING METHODS

- Quality Assurance System

- The on-line Learning System

Quality   Assurance System

- AUTH Presentation

Quality Assurance System

- **Definition**

- The purpose of the Quality Assurance and Accreditation Agency (_H.Q.A.A_.) is to formulate and implement a unified system of quality assurance, as a reference system to the achievements and work done by the Institutions of Higher Education. Furthermore, to gather and codify the critical information that will guide the State to effectively support the country's higher education.

- Relevant to both

  - academic programs of all three levels, e-learning and lifelong learning programs

  - and

  - Higher Institutions internal quality assurance system

Quality Assurance System

- **Mission**

- Responsibilities of quality accreditation:

  - Periodically certifies the quality of:
    - the internal systems of quality assurance of HEIs as defined in the Article 14 and
    - the curricula of higher education, including short-cycle programmes, lifelong learning, e-learning, as well as collaborations with other domestic or foreign educational or research institutions

  - Suggests to the Minister of Education and Religious Affairs, Culture and Sports, as well as the governing bodies of the HEIs, ways and means for the continuous ensure of high quality in higher education.

Quality Assurance System

➡ **Mission**

➡ To achieve its mission and to apply its responsibilities, the Agency:

  ➡ forms, organizes, specifies, standardizes and publishes in advance the relevant procedures, *criteria and indicators*, particularly, in the framework of the common principles and guidelines of the European Higher Education Area,

  ➡ develops an *integrated information management system and assessment database*, in collaboration with the Quality Assurance *Units* (MODIP) of the universities,

  ➡ supports the universities and their units in the *planning of the quality assurance* and accreditation procedures and

  ➡ *conducts studies and researches* related to its mission or has other institutions make them for it

Quality Assurance System

- **Accreditation**

- The Accreditation is a ***process of external evaluation*** based on specific, predetermined, internationally accepted and publicized in advance, quantitative and qualitative criteria and indicators. The purpose of accreditation is the external quality assurance in higher education and the efficiency and transparency of the overall function of the Higher Education Institutions

Evaluation Process

- Evaluation Process

Expected results

- To comply with the Policy and Quality Standards

- To support the improvement in internationalization and degrees' competitiveness

According to the Yerevan ministerial agreement European academic titles will be mutually recognized by 2020

The main requirements 1

- Quality assurance policy of the academic unit to be in accordance with the Institution's one
- Sets specific goals for Curriculum improvements
- Communicate the policy both internally and externally

The main requirements 2

- Curriculum design
- Target, structure and expected results
  - Content update
- Comparison with market needs and professional capacities of the graduates
- Competitiveness, sustainability and comparability with other curriculums

The main requirements 3

- Student in the center –Student Evaluation
- Development of attractive learning environment for successful copletion of studies
- Various teaching methodologies
- Evaluate the student satisfaction

The main requirements 4

- Teaching staff evaluation
- Written criteria and requirements of teachers
- Conference participation funding and research incentives
- Knowledge transfer methods incubators, intellectual property rights policy

The main requirements 5

European Interdisciplinary Silk Road Tourism Centre - Aristotle University of Thessaloniki

- Established on 29 August 2017 at Aristotle University of Thessaloniki (AUTh), by unanimous decision of the Senate of the University

- AIM

  - promote international synergies and regional cooperation perspectives,

  - encourage interdisciplinary research on

    - how to enhance prospects for tourism development initiatives and cross-border collaboration,

    - as cultural exchange development among countries on the Silk Road,

    Based upon scientific documentation and analysis of the Silk Road cultural heritage

means

- - Providing systematic study and databases interpretation, sharing and distributing information about identifying, documenting, mapping and promoting the tangible and intangible cultural heritage and tourism potential of the Silk Road;

- - Publishing of Silk Road scientific studies and academic research findings;

- - Creation of a network of Universities along the Silk Road countries, to develop curricula on sustainable tourism initiatives based on the Silk Road cultural footprint and support the development of further educational and cultural links among EU Universities and Universities on the Asian Silk Road countries.

support

➥ The United Nations World Tourism Organization (UNWTO)

➥ The Ministry of Tourism of Greece,

is in line with holistic internationalization strategy of

Aristotle University of Thessaloniki that has been actively involved in the Western Silk Road Tourism Development Initiative, being one of the Universities selected by UNWTO to participate in the UNWTO – EU research on the "Western Silk Road Tourism Development Initiative"

Thank you!
